Building/Site Address for Fence Location

Type of Fence:

Height (specify inches/feet)	New	Replacement
------------------------------	-----	-------------

State any special circumstances which should be considered:

In area below (or as an attachment), provide a site plan showing the shape of your lot with dash lines; house, garage and/or other buildings in approximate location, and proposed fence location with a solid line.

**NOTE:** It is the responsibility of the applicant and/or owner for location of the fence so that it is placed on the owner's property. The Public Works Department shall review fence applications located near alleyways.

Diggers Hotline (800-242-8511) shall be called prior to digging any holes.

The owner/applicant agrees to comply with Chapter 106-16 and all other applicable Municipal Code requirements; understands that the issuance of the permit creates no legal liability on the City and certifies that all of the submitted information is accurate.

SIGNATURE OF APPLICANT \_\_\_\_\_ DATE \_\_\_\_\_

Nonrefundable Application Fee of \$30.00  
2/17/09

**§ 106-16. Fences.**

- A. Permit required. No fence shall be placed, erected or built on any premises in the City, except that on application therefor and for good cause shown, the Planner/Zoning Administrator may grant permits for the erection of fences when such fences will not, in the judgment of the Planner/Zoning Administrator, interfere with public health, safety and welfare. [Amended by Ord. No. 11-92]
- B. Application. All applications for fence permits shall be accompanied by a nonrefundable fee as established by the Common Council and shall be submitted to the Planner/Zoning Administrator, who shall inspect the site of each proposed fence and shall consider whether the proposed fence will substantially interfere with the view, light or free flow of air. The Planner/Zoning Administrator may approve or deny applications or submit the application to the Public Safety Committee for its recommendation to the Common Council for consideration. [Amended by Ord. No. 11-92; 5-1-2000 by Ord. No. 9-00]
- C. Wire fences. Wire fences are to be of chain link construction or a vinyl-coated minimum wire gauge of No. 16 with maximum opening of two inches by three inches. [Amended by Ord. No. 3-84]
- D. Wood fences. Redwood shall be preferred for durability. Woods other than redwood may be used, provided that they are suitably maintained or painted.
- E. Height. Fence wire, panels or boards may not exceed a height greater than six feet. The bottom panels or boards shall not be more than two inches above the existing grade of the property, except that the Building Inspector or Zoning Administrator may use discretion to allow a greater area between the ground and the bottom of the fence to accommodate uneven grades of the property. No fence constructed in residential districts shall exceed four feet in height in the front, side or rear yards adjacent to streets, with alleyways not to be considered streets. Fencing around swimming pools shall be in accordance with the Municipal Code, § 106-17C(8). When unusual circumstances exist, exceptions to height requirements may be granted upon application to the Board of Appeals. In considering any requests for an exception, the Board of Appeals shall consider the need for the exception, the effect on abutting property owners and the neighborhood, and the public health, safety and welfare. [Amended by Ord. No. 11-92; 12-1-2003 by Ord. No. 16-03]
- F. Location. The property owner shall be responsible for the proper placement and location of the fence.
- G. Definition. The term "fence" shall not be construed to include racks or trellises for support of

vines or flowers.

- H. Barbed wire. No residential fence consisting wholly or in part of barbed wire shall be erected or maintained in the City. [Amended by Ord. No. 11-92]
- I. Security fences. The Council, upon proper application, may approve security fences for commercial and industrial zones of such design and construction as it shall deem proper.
- J. The side of the fence considered to be the face or finished side (as opposed to the structural supports) shall face the abutting property. The finished side is the side of the fence minimizing the view of posts and supports. [Added 12-1-2003 by Ord. No. 16-03]
